U2

the best there is.

now, you can own an uzi.

A masterful adaptation of the internationally acclaimed UZI 9mm submachine gun, the UZI Semi-Automatic Carbine is now being distributed throughout the United States, exclusively by Action Arms Ltd.

It is providing collectors, sportsmen and gun enthusiasts of every description with understandable pride in owning one of the finest firearms ever manufactured. And it is also providing them with an unprecedented sense of security with the knowledge that their UZI is one of the safest, simplest and surest semi-automatics available in the world today.

First introduced in 1954, the UZI submachine gun established standards of precision and perfection that resulted in its unrivalled reputation.

Designed by Col. Uzi Gal (Ret.), an officer of the Israeli Army, the UZI won fame in Israel's historic six-day war. It soon became the choice of the NATO alliance and was adopted for use in armies of major western and third world countries. It is also

used extensively by security personnel protecting leaders of the free world. The UZI has earned lavish praise in the pages of such authoritative publications as *Small Arms of the World*, *Jane's Small Arms*, *The World's Submachine Guns*, and many others.

Everywhere the judgement is the same: the UZI is the finest submachine gun ever designed.

Action Arms' UZI Semi-Automatic Carbine, designed by Col. Uzi Gal, incorporates modifications of his submachine gun so that it meets the requirements of U.S. Federal regulations.

In appearance the UZI Semi-Automatic is virtually identical to the submachine gun, except for a longer barrel. A principal difference between the two is that the Semi-Automatic works from a closed breech with floating firing pin while the submachine gun has an open breech with fixed firing pin. The Semi-Automatic's 16.1" barrel length delivers a muzzle velocity of 1,250 to 1,500 feet per second, depending on type of ammunition used. The long barrel, coupled with the closed breech, provides accuracy and stability in every conceivable circumstance.

This is UZI. An authentic small-arms masterpiece. A gun that you can fire accurately and dependably every time.

The UZI owner quickly recognizes the outstanding qualities of his semi-automatic: stability, safety, compactness, reliability, a center of gravity that provides excellent balance and comfortable handling, ease of cleaning and maintenance. An extremely low recoil and perfect balance permit accurate firepower even when held in only one hand.

The UZI Semi-Automatic is manufactured by Israel Military Industries, as is the submachine gun. Each Semi-Automatic is subjected to IMI's rigid inspection procedures—the most stringent in the industry. Each is 100% tested. It is this strict adherence to UZI standards of design and manufacture which make the UZI a pleasure to own and use.

Action Arms, with offices in Philadelphia, PA, offers service facilities as well as convenient domestic warehousing of genuine UZI accessories. And since UZI owners frequently like to express their pride of ownership, Action Arms has introduced several attractive, useful memorabilia items as shown on the back page.

To see and purchase the UZI Semi-Automatic, accessories and memorabilia, visit your favorite firearms or sporting goods store.
