

UFA

Uzi is h

the legendary uzi

Proud veteran of Israel's historic six-day war.

Choice of the NATO alliance.

Selected by major western and third-world countries for their armies.

Uzi. In the hands of the U.S. Secret Service it protects the President of the United States.

Designed by an officer of the Israeli Army and introduced to the world in 1954, the Uzi 9mm submachine gun has been lavishly praised in the pages of *Small Arms of the World*, *Jane's Small Arms*, *The World's Submachine Guns*, and many other authoritative publications.

Everywhere the judgement is the same: the Uzi is the finest submachine gun ever designed. Now, as a semi-automatic carbine, the Uzi is available — for the first time in history — to collectors in the United States.

Adapted by its designer, Col. Uzi Gal (Ret.), to meet the requirements

of Federal regulations in the United States, the Uzi is manufactured for the U.S. market by Israel Military Industries, producers of the original model and exclusive supplier of the Uzi to the Israel army.

In appearance the Uzi submachine gun and the semi-automatic are identical, except for the longer barrel length of the new model. The principal difference between the two is that the semi-automatic works from a closed breech with a floating firing pin, while the standard submachine gun operates from an open breech with a fixed firing pin. Both are blowback operated.

Like the standard submachine gun, the semi-automatic has a very low recoil and can be fired comfortably and accurately while held in only one hand.

The caliber of the semi-automatic, 9mm Parabellum, is the same as the submachine gun. With its 16.1" barrel length, the carbine delivers a muzzle velocity of 1250 to 1500 feet per second, depending

on type of ammunition used. The long barrel, coupled with the closed breech, provides accuracy of fire and stability of operation in every conceivable circumstance.

Collectors will be glad to know that the qualities that distinguished the Uzi submachine gun, both in terms of efficiency of operation and human engineering, are prominent features of the semi-automatic: stability, compactness, reliability, a center of gravity that provides excellent balance and comfortable handling, ease of cleaning and maintenance, and accurate firepower. These qualities make the Uzi a pleasure to own and use.

Those fortunate enough to obtain an Uzi will receive a certificate signed by Col. Uzi Gal certifying that the gun was designed by him, and that it was made by the same manufacturers' as his original submachine

ere!

gun, from the same materials, and according to the same standards of quality and performance. Each semi-automatic is subjected to the same inspection procedures as the submachine gun, and each is 100% tested.

This is Uzi. An authentic small-arms masterpiece that permits quick "hand finds hand" change of magazines even at night and in the worst possible conditions.

A gun that fires accurately and dependably every time.

**UZI the
best there is.**

action arms ltd.

Each Uzi semi-automatic is delivered to its owner in a molded Styrofoam case, complete with carrying sling, a 25-round magazine and a detailed owner's manual. Two barrels are supplied with each Uzi: a 16.1" barrel that

conforms to U.S. regulations, and a shorter display barrel that duplicates the appearance of the original Uzi submachine gun. (The display barrel has no bore or chamber and is for appearances only.)

UZI specifications

TYPE	SEMI AUTOMATIC CARBINE
DESIGNATION	UZI
MANUFACTURER	ISRAEL MILITARY INDUSTRIES
CALIBER	9mm PARABELLUM
OPERATION PRINCIPLE	BLOWBACK, CLOSED BREECH WITH FLOATING FIRING PIN
TYPE OF FIRE	SEMI AUTOMATIC ONLY
MAGAZINE	STAGGERED BOX TYPE HOLDING 25 ROUNDS
SAFETY SYSTEMS	1. FIRE SELECTOR IN POSITION "S" 2. PISTOL GRIP SAFETY
SIGHTS	FRONT: "POST" TYPE REAR: L FLIP TYPE ADJUSTABLE FOR 100m (330 ft) and 200m (660 ft)
STOCK	FOLDING METAL STOCK
WEIGHT – UNLOADED	3.90 kg (8.58 lb)
WEIGHT – EMPTY MAGAZINE	200 g (0.44 lb)
LENGTH – METAL STOCK FOLDED	615mm (24.2 in)
LENGTH – METAL STOCK EXTENDED	800mm (31.5 in)
BARREL LENGTH	410mm (16.1 in)
NUMBER OF LANDS & GROOVES	4 – (RIGHT HAND TWIST) 1 TURN IN 10"
*APPROXIMATE MUZZLE VELOCITY	380-460 m/sec (1250-1500 ft/sec)
*MAXIMUM RANGE	UP TO 2000m (2200 yd) at 30° ELEVATION

*Depending upon type of ammunition used.
