BORN IN ISRAEL....

A WORLD-RENOWNED SUB-MACHINEGUN AND THE AMERICAN CHALLENGE

Since its introduction into the Israeli Armed Forces almost three decades ago, the Uzi sub-machinegun, as designed by Major Uziel Gal, has set standards of performance and reliability for the armed forces and law enforcement agencies of the world. The success of this legendary sub-machinegun is the inspiration behind our American-made counterpart.

Over several years the project has evolved, from blue prints to finished product.

AUTOMATIC WEAPONRY, with years of industry experience, is pleased to bring you the UZI SUB-MACHINEGUN DESIGN, **UNRESTRICTED** and MADE IN THE USA.

THE FINEST MATERIALS AND CONSTRUCTION: BUILT FOR DURABILITY

The quality of any product is dependent not only upon good craftsmanship, but also upon the tools and materials used in its construction.

To insure the close tolerances and consistency critical to the manufacture of the UZI SUB-MACHINEGUN DESIGN, computer-operated milling machines and lathes are used.

Only the best steel—which meets military

specifications—along with proper heat treating techniques has been used in both the stamped and fully machined parts. Even the barrel has been hard-chrome lined; a small detail, but an important one for increased durability.

When assembly and finishing are completed, every UZI SUB-MACHINEGUN DESIGN is fully tested for smooth functioning and reliable operation.

LAWFUL OWNERSHIP UNDER FEDERAL REGULATION

The National Firearms Act of 1934 has provided for the lawful ownership of machineguns for over half a century.

Under these federal regulations, ownership of the UZI SUB-MACHINEGUN DESIGN can be both easy and uncomplicated. The purchaser need only be 21 years of age, a U.S. citizen, and have a clean record with no criminal charges.

Although federal regulations require that the proper paperwork be submitted for transfer approval, all forms necessary are supplied already completed except for the required signatures. All you must do is simply obtain these signatures, provide passport photos and fingerprints.

MADE IN THE USA

*Approximately one half
actual size*

**ACT NOW.
ONLY LIMITED QUANTITIES
ARE AVAILABLE**

On May 19, 1986, a new federal law went into effect which restricts the sale of all machineguns, manufactured and registered after that date, to law enforcement and government agencies only.

These exceptional selective-fire sub-machineguns were manufactured and registered before that time and are not affected by the law. This makes them available, **UNRESTRICTED**, to both individuals and dealers.

However, they have been made with great care and were not produced in large quantities. When this limited number of the UZI SUB-MACHINEGUN DESIGN has been sold, THERE WILL BE NO MORE.
